EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:

- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:

- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:

- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:

- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:

- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:

- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52:

- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 53:

- B-Binders, seconds, and brokes
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:

- B-Binders
- C-Fillers
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:

- B-Binders
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:

- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:

- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Total Stocks Same As A Year Ago

Stocks of all types ^{1/} of leaf tobacco owned by dealers and manufacturers in the United States and Puerto Rico totaled 3,942 million pounds (farm-sales-weight) as of April 1, 1951 ^{2/} - approximately the same quantity as reported a year earlier. The 1950 tobacco crop was in stocks by April 1 with the exception of about 75 million pounds, consisting mostly of Maryland, Pennsylvania Seedleaf, and Puerto Rican tobacco.

For the southern types, flue-cured stocks were up 2 percent while holdings of Maryland tobacco were 22 percent greater than on the previous April 1. Stocks of Burley leaf were around 3 percent below the April 1 level a year ago, while fire-cured holdings showed a 10 percent drop and dark air-cured stocks decreased 4 percent. For cigar leaf, stocks of the filler types were down about 6 percent, whereas holdings of the binder and shade-grown types were up around 5 percent each compared with the previous April 1.

^{1/} Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

^{2/} The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE-LEAF STOCKS

Flue-cured and Maryland Stocks Larger Than A Year Ago; Burley Slightly Lower; Foreign Cigarette Leaf Stocks Up Sharply

Flue-cured tobacco holdings were 1,796 million pounds this April 1 compared with 1,754 million a year ago. Although stocks of flue-cured leaf are greater than on the previous April 1, the quantity on hand is slightly below the peak figure for this quarter as of April 1, 1948.

Burley tobacco stocks were down from the previous April 1 level, reflecting the smaller 1950 crop compared with the previous one. Holdings this April 1 totaled 1,241 million pounds as compared with 1,283 million a year earlier. Marketing of the 1950 crop of around 499 million pounds was completed during the first quarter. This compared with a production of around 560 million pounds in 1949.

Maryland leaf inventories were up 8.6 million pounds compared with last April 1 and were at the highest level on record for this quarter. Stocks on April 1, 1951 totaled 46.7 million pounds. The 1950 crop, estimated at 40.0 million pounds, will be marketed during the May-August period of this year.

Domestic Aromatic tobacco has been designated as Type 77 and stocks were reported separately from the other miscellaneous domestic category for the first time. Holdings as of April 1, 1951 totaled 628 thousand pounds.

Foreign-grown cigarette and smoking tobacco (Turkish and other) stocks were reported as 172.3 million pounds as of this April 1 for an increase of 20.5 million from a year ago. Holdings were the largest on record for this quarter.

DARK TOBACCO STOCKS

Fire-cured and Dark Air-cured Holdings Down Compared With Previous April 1

Fire-cured tobacco stocks showed a marked decrease from a year ago. Holdings as of April 1, 1951 totaled 177.9 million pounds as compared with 198.6 million pounds on hand April 1 last year. Inventories of Type 22 and Type 23 were each down about 10 million pounds whereas stocks of Type 21 leaf were approximately the same as a year earlier. Holdings of fire-cured tobacco were divided as follows: Virginia fire-cured, 28.7 million pounds; Eastern District Tennessee and Kentucky, 105.6 million pounds; Western District, 43.3 million; and Henderson Stemming 0.3 million. Marketing of the 1950 crop was completed during the first quarter and sales totaled around 56.0 million pounds or 16 million less than for the previous crop.

Dark air-cured tobacco stocks totaled 90.1 million pounds this April 1 which was a decrease of 4.0 million pounds from the previous April 1 level. Holdings of Type 35 were around 1.1 million below a year ago while Type 36 stocks declined 2.7 million pounds. Stocks of One Sucker tobacco on April 1, 1951 were 49.3 million pounds, Green River 36.5 million, and Virginia sun-cured 4.3 million. Marketings of the 1950 crop, completed during the first quarter, totaled around 28.0 million pounds compared with 35.9 million for the 1949 crop.

CIGAR-LEAF STOCKS

Stocks of Filler Types Lower; Holdings of Binder and Shade-grown Types Larger Than A Year Ago

Stocks of cigar-leaf were 397.7 million pounds (farm-sales-weight) for all domestic types including Puerto Rican, and 16.3 million pounds (unstemmed equivalent) for foreign-grown cigar leaf types as of April 1, 1951. The corresponding figures for April 1 a year ago were 402.4 million pounds and 18.9 million pounds, respectively. Most of the 1950 crop was in stocks prior to April 1, except for part of the Type 41 crop plus most of Type 46 crop.

Stocks of the cigar filler types in the hands of dealers and manufacturers were 211.5 million pounds this April 1 compared with 224.2 million a year ago. A considerable amount of the 1950 crop of Type 41 remained in the hands of growers this April 1 while practically all of the 1949 crop was in stocks by the end of the first quarter. Holdings of Type 46 showed a marked decrease of 8.3 million pounds from the previous April 1. Stocks of cigar filler were divided as follows: Pennsylvania Seedleaf, 133.0 million pounds, Ohio filler 34.3 million; and Puerto Rican filler 44.1 million of which 17.4 million pounds were on the Island.

Stocks of the cigar-binder types were 162.8 million pounds - an increase of 7.0 million pounds compared with the previous April 1. The increase was accounted for by larger stocks of Type 52 and Type 55 which considerably more than balanced a decrease in Type 51 and Type 54 stocks compared with a year ago. Binder type stocks on April 1, 1951 were divided as follows: Connecticut Valley Broadleaf 32.0 million pounds, Connecticut Valley Havana Seed 34.0 million, New York and Pennsylvania Havana Seed 2.2 million, Southern Wisconsin 42.6 million and Northern Wisconsin 52.1 million.

Shade-grown leaf holdings totaled 23.5 million pounds on April 1, 1951 compared with 22.5 million a year ago. All of the increase was the result of larger stocks of Type 62 as holdings of Type 61 were the same as a year earlier. Connecticut Valley shade stocks were 15.6 million pounds and Georgia-Florida shade 7.9 million.

Stocks of Cuban (Havana) leaf as of April 1, 1951 were 15.6 million pounds as compared with 18.4 million a year ago. Holdings of Sumatra and Java leaf were 0.6 million pounds, Philippine Islands (Manila) 0.1 million and other miscellaneous foreign-grown less than 0.1 million.

Table 1.--Average percentage of weight remaining after handling, sweating, drying, and stemming for all types of tobacco, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent 1/

SOUTHERN TYPES (11-37)

1 Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937. 2 Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating and storage. 3 Ohio-Miami Valley filler types of tobacco packed in cases by growers before delivery. 4 See footnote 1 on page 5 for conversion factor to the farm-sales weight equivalent. 5 Tentative factor. 6 Factor has not been determined.

Table 2.—Stocks of leaf tobacco owned by dealers and manufacturers, by types, converted to a farm-sales-weight equivalent, April 1, 1951, compared with other quarters ^{1/}

FARM-SALES WEIGHT

Type name	U.S. type number	April 1, 1951	April 1, 1950	April 1, 1949	January 1, 1951	October 1, 1950	July 1, 1950

^{1/} For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales-weight, marked weight, or swated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for April 1, 1951 are as follows: Type 41, 107; Types 42-44, 113; Type 51, 106; Type 52, 105; Type 53, 108; Type 54, 106; Type 55, 106; Type 56, 123; Type 61, 109; Type 62, 114. April 1, 1951 figures subject to revision.

^{2/} For explanation of stocks included in this classification, see footnote 5 on page 12.

^{3/} Foreign-grown leaf is converted to an unstemmed equivalent basis only.

^{4/} Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in January 1 report.

1/ Subject to revision.

2/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.

3/ Includes Puerto Rican on the Island, Type 46.

4/ Type 84.-Other foreign-grown all shown in the C group.

5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

6/ Type 77.-Domestic Aromatic formerly reported under Type 73.

7/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in January 1 report.

Table 4.- Stocks of leaf tobacco by types, showing separately quantities owned by dealers and manufacturers, April 1, 1951, compared with April 1, 1950 ^{1/}

- ^{1/} These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.
- ^{2/} The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.
- ^{3/} Includes stocks on the Island of Puerto Rico.
- ^{4/} For explanation of stocks included in this classification see footnote 5 on page 12.
- ^{5/} Does not include Sumatra and Java leaf stored in the Free Trade Zone.

Table 5.--Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, April 1, 1951 compared with other quarters ^{1/}
